

# Hackathone 3 Day 2

(by Shagufta Zakir)

## PLANNING THE TECHNICAL FOUNDATION

### TAJ Mart E-Commerce Website

- **System Architecture Fronted:**

(UI) <--> Sanity CMS <--> Third-Party APIs

#### **Description of Component:**

- **Frontend (UI)**

Using Next.js for designing My frontend

This is the user friendly application where customers interact with the marketplace.

- **Sanity CMS**

Using sanity for manage and deliver product data, inventory, and other dynamic content to the frontend.

- **Third party API**

These APIs handle external interaction, such as real time inventory updates, shipping and delivery status.
